Certifications and Affiliations

FIRE DETECTION UNLIMITED IS
YOUR RELIABLE PARTNER
In Fire Alarm Systems in San Francisco.

Fire Alarm Systems

For over 20 years, FDU has provided Fire Alarm Systems designed to keep both properties and lives safe. We help engineers, contractors, and business owners with design build, project management, underwriting, and implementation of all fire systems. FDU proudly partners with AutoCall, Honeywell, and Siemens systems to give our customers just what they need.

Monitoring

A fire alarm and life safety system is only as good as the monitoring services they come with, and Fire Detection Unlimited offers the best in the San Francisco Bay Area. Our UL-listed facility is computerized, digital, and completely up-to-the-minute — offering fast response times and overall cost savings.

Two-Way Emergency Communication Systems

Don't trust the safety of your building with just anyone. At FDU we help the integration of wired two-way emergency communication systems into fire detection systems. Mitigating the risks for your San Francisco Bay Area facility by providing both wired and wireless options for emergency communication in compliance with local building codes.

Testing & Inspection

Fire Alarm systems need to be regularly tested and inspected to ensure that they are working in proper order. At FDU we understand code requirements better than anyone, and will ensure that your system is operating properly along with ensuring code compliance. We pride ourselves on being your one-stop solution for all your fire safety needs.

PROUDLY PARTNERED

with AutoCall, Honeywell, and Siemens to Provide the Best Fire System Solutions in San Francisco.

The AutoCall 4100ES is designed to handle complex facility requirements with ease. It brings fully addressable technology for both initiating and notification circuits and scalable design flexibility to medium and large facilities and multi-building campus networks. Supporting up to 3,000 addressable points, the 4100ES is networkable, offers system-wide voice notification/audio capability that is UL 2572 listed for Emergency Communications purposes, and is listed for multi-hazard suppression release control. An optional, large configurable, color touch screen display provides a wealth of information and an intuitive, easy-to-use interface.

Honeywell

Exceeding NFPA Standards, FM Approvals and UL listing requirements, the S3 Series offers a highly reliable, innovative fire alarm system for small to mid-size buildings. Known for its innovation in fire alarm and emergency communications technology, Honeywell recognized the market need for a simple fire alarm system that is easy to use, simple to install, budget friendly and most importantly, protects the building and its occupants with the best in advanced technology.

SIEMENS

Whether you are protecting a small retail store, commercial building, marine vessel or complex university campus, the Cerberus PRO portfolio offers a complete line of solutions to protect your facility and the flexible design ensuring it offers the right life safety design for your needs. When it comes to protecting the things that matter, it matters how you protect them.
